An Informatics Engineering student with a strong interest in fullstack web development, particularly using Laravel and React. Experienced in building personal and academic projects, including full-featured applications with authentication and database integration. Proactive team player who thrives in small collaborative environments, and currently seeking a developer internship to apply practical skills and grow in a professional setting.

PROJECTS

Journify App (Mini Blog Platform), Personal Project

Feb 21 – Feb 25, 2024

Stack: PHP, Laravel, MySQL, Tailwind CSS

- Built a mini blogging platform from scratch in 5 days as a personal learning project.
- Implemented full CRUD functionality for articles, user authentication, and profile customization features.
- Added article filtering by category and user profile management including name and photo updates.

Hapi Bookshelf API, Backend Course Project (Dicoding)

Mar – May 2024

Stack: Node.js, Hapi.js, JavaScript, nanoid, ESLint, PostgreSQL

- Built a RESTful API for managing a digital book collection with full CRUD capabilities.
- Implemented features such as book creation, read-status filtering, book updates, and deletion.
- Designed the backend architecture and developed all endpoints using Hapi.js, ensuring scalability and code quality through ESLint.

I Secret Web Profile, Organization Project

Jun 2024 – Aug 2024

Stack: Laravel, MySQL, Tailwind CSS, React

- Developed a web-based profile and management system for a student organization.
- Implemented features such as member directories, event listings, and admin authentication.
- Contributed to the backend by building the "Posts" feature with full CRUD functionality, enabling efficient content management by admins.

Browser Extensions Manager, Personal Project

Jul 2025

Stack: HTML5, JavaScript (ES6+), Tailwind CSS, Cash-DOM, Vite

- Built a responsive web application to manage browser extensions as a learning project focused on DOM manipulation and modern UI development.
- Implemented key features including add/delete extensions, real-time search, and status toggling.
- Developed the entire project from scratch, handling UI design, logic implementation, and Tailwind-based styling as a foundation for transitioning into React.

EDUCATION

Universitas Negeri Semarnag, Semarang

Aug 2023 – Present

Bachelor of Computer Science, Informatics Engineering

ACHIEVEMENTS

Digital Business Innovation Competition, Semarang

Dec 2024

Awarded 3rd Place for presenting a tech-based solution integrating academic knowledge with digital business innovation.
